CHAPTER 4
SPECIFICATIONS AND ALLIED TECHNICAL DETAILS

4.1 Detailed Specification

Preamble: - The use of laser projectors makes mechanical templates or time-consuming measurement procedures obsolete. The data file for projection is generated from the CAD data used for product design. The outlines of the different layers are shown on the tool surface. Large areas are covered by connecting the required number of projectors. ACD would like to acquire a Laser Projector to reduce manufacturing time of LCA Composite parts and its assembly.

Typically, laser projection systems demonstrate how laser projection technology can offer more control over the composites processing. A typical laser projector consists of the following parts like Laser Projector, Software for processing input data, Distribution Box, remote, targets etc.,

Scope: Supply, installation, commissioning, testing & Calibration of Laser Projection System and Training on the parts. The clean room ceiling height is 5 meter (approx.) in which the projectors are to be installed. The Bidder, if required, may visit the site. The Bidder should provide the Schematic diagram/drawing for installation & commissioning in the technical bid and to clearly indicate CSIR- scope of work. The Laser projection system shall be tested at CSIR- site after installation & commissioning to meet the specification requirements.
